Brand: -

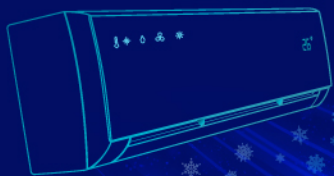

Company Profile:

A pioneering spirit and the courage of innovation were the driving forces behind Emil Ziehl's development of his first external rotor motor over a hundred years ago. With this he laid the corner stone for the success story of ZIEHL-ABEGG in 1910. Today, the family company ZIEHL-ABEGG, with its headquarters in Kunzelsau, develops, produces and sells high quality, high-tech components: Fans, special electric motors and their perfectly adapted, state-of-the-art control technology. Still today, Emil Ziehl's pioneering spirit is the motivator for making good even better and finding new, revolutionary solutions. ZIEHL-ABEGG is based in Southern Germany but is at home all over the world. At the world-wide production and sales sites, thousands of employees develop, produce and sell technical, economical and ecological progress.

Category:	GERMENT
Products and services:	-
Brand:	-

Company Profile:

President Automobile Industries was founded in 1982 by Somchai and Somsak Lertkajornkitti. Recognizing the need for a cooling system components replacement market in Southeast Asia, the brother founded and built a company that from its beginning has been driven by their vision, energy and desire for excellence in product quality and customer satisfaction.

Today, President' customer base cover the entirety of ASIAN market, North American, Middle East and African. There company reputation for high-quality products and customer satisfaction has established President as a leading manufacturer of cooling system components to the automotive aftermarket.

Now, after a decade of unparalleled success in a thriving international aftermarket, President enters the Australia and European aftermarket.

We enter these markets with the confidence that the philosophy and experience that has served us well in Asia will also apply throughout the world. That experience and philosophy is that total distributor support is the key to success in competitive automotive aftermarket. The entire President organization has been totally dedicated to a philosophy of achieving this absolute customer satisfaction.

If you feel, as we do, that the strongest aftermarket manufacturers are those who put their distributor customers' need above all else, if you need both the highest quality products and competitive pricing to serve your customers, President should be your source for automotive air conditioning replacement parts.

If your company distributes cooling system replacement components we would welcome your inquiry to ourselves personally.

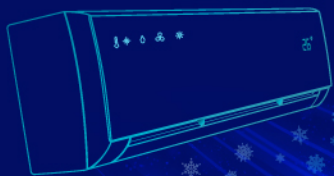

We thank you for considering President Automobile Industries Public Company Limited

Company Profile:

In 1960, Sweden is about to start its nuclear program. Air filtration specialist Gösta Larson realizes that these new power plants need air filters of better quality than ever before. Using low quality air filters in a nuclear plant can quickly turn into a catastrophe. Gosta convinces the nuclear engineers to start using top quality filters and quickly wins a business contract. In 1963, he builds his first factory in Trosa, Sweden. Camfil is founded.

Today, with more than 50 years of experience, Camfil delivers clean air solutions to customers and local markets all over the world. With high quality products, we are contributing to something that is essential to everyone - clean air for health, performance and well-being.

Company Profile:

BUILT ON A LEGACY OF INNOVATION

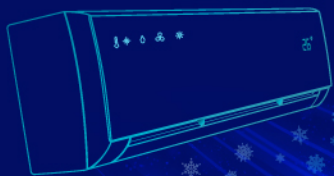

- 1891 Chain Belt Company (predecessor to Rexnord) is founded, focusing on chain-driven machinery.
- 1892 Herman Falk establishes Falk Corporation.
- 1910 Falk begins producing precision herringbone gears, becoming a leader in gear technology.
- 1914 Rex Brand Chain is introduced, revolutionizing chain-driven systems.
- 1927 Bauer Gear is founded in Germany, specializing in gear motor solutions.
- 1942 Kollmorgen awarded the Army-Navy Production Award for its contributions during WWII.
- 1943 Falk constructs the "Navy Building" to produce marine gear drives for the U.S. Navy during WWII.
- 1955 Beloit Tool Company (later Regal Beloit) is founded in a roller rink, focusing on cutting tools.
- 1962 Regal Beloit patents the Browning MVP Sheave, a significant innovation in variable pitch sheaves.
- 1989 Regal acquires Foote-Jones, enhancing its gear drive offerings.
- 1991 Regal acquires Hub City, expanding its portfolio in bevel gear drives and modular systems.
- 2004 Acquisition of GE's Commercial AC and HVAC motor businesses Altra Industrial Motion is founded, bringing together brands like Boston Gear, Warner Electric, and Wichita Clutch.
- 2005 Rexnord acquires Falk Corporation, integrating its expertise in gears and couplings.
- 2021 Rexnord PMC merges with Regal Beloit to form Regal Rexnord Corporation, creating a powerhouse in power transmission and motion control.
- 2023 Regal Rexnord acquires Altra Industrial Motion, further enhancing its automation & powertrain capabilities.
- 2024 Regal Rexnord names Milwaukee as its corporate headquarters, honoring the city's legacy as the "Machine Shop of the World."

Category: RHVAC EQUIPMENT PARTS & MATERIALS

Products and services: R32, R290 and multi-refrigerant inverter compressors for VRF, chillers, AHUs, rooftop systems, heating applications, commercial refrigeration and plug-in units

Brand: ME-SCI

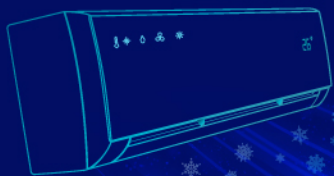

Company Profile:

Mitsubishi Electric Siam Compressor Industry Co., Ltd. (ME-SCI) is Thailand's first manufacturer of rotary compressors for air-conditioning applications, was founded on May 25, 1990, which was managed and arranged by Mitsubishi Electric Corporation of Japan, an expert in the production of compressors with over 70 years of experience. In 2003, ME-SCI expands production line by producing Advanced Scroll which use technology of Frame Compliance Mechanism (FCM). This latest technology for scroll compressors from Mitsubishi Electric will optimize the energy usage and minimize losses during operation.

Every stage of production process is controlled by modern, sophisticated technology and competent, knowledgeable staff. As a result, ME-SCI has undergone a great business expansion and extended its market reach from Thailand's to many countries around the world.

Brand: Huba Control

Company Profile:

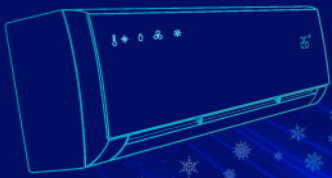

The ERA of Quality & Sustainability

A New Chapter in Engineering: From a Strong Foundation to a Decade of Sustainability

In a rapidly changing business world, challenges are no longer limited to commercial competition. They now encompass a profound responsibility toward resources, energy, and the environment. This pivotal turning point inspired us, Q ERA Corporation, to elevate our organization, transcend traditional boundaries, and step forward as a leader ready to meet the demands of the future.

Previously known as Q Inter Supply, Q ERA Corporation is a premier engineering firm specializing in Refrigeration & HVAC (Heating, Ventilation, and Air Conditioning) systems. For over 18 years, we have been the trusted force behind the success of numerous enterprises across the industrial, commercial, and healthcare sectors—delivering world-class equipment and precision engineering solutions.

On January 1, 2026, we officially entered a new era under the name 'Q ERA Corporation.' This transition represents far more than a name change; it is a declaration of our new strategic positioning. We are evolving from a standard equipment supplier into an 'Engineering Partner for Sustainability'—a comprehensive engineering partner dedicated to solving today's sustainability challenges.

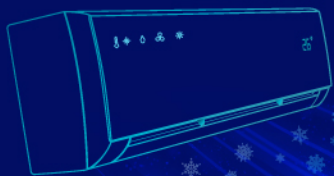

**BANGKOK RHVAC 2026
& BANGKOK E&E 2026**

We firmly believe that the future of cooling must not come at the expense of skyrocketing energy costs or environmental degradation. Instead, tomorrow's cooling must be "Smart, Cost-Effective, and Sustainable." This is the core philosophy driving Q ERA today.

Products and services: Highly Flexible Duct – ECONOFLEX, SEMI Rigid Flexible Duct, Insulated Flexible Duct – Fiberglass Insulation, SONODEC – TRD, A2G, APA-L (LEED 4 & LEED 4.1 BETA), APA, APAX, SPA, SAPA

Brand: -

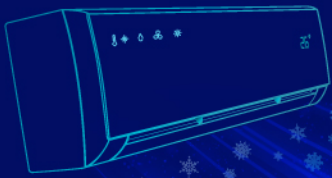

Company Profile:

Duct Excel Co., Ltd. was established on 16 January 1995. The Company initially operated as the exclusive distributor in Thailand of flexible air ducts manufactured by DEC International, a leading producer of high-quality air duct systems based in the Netherlands.

Building upon its industry expertise, the Company subsequently began manufacturing flexible air ducts domestically under stringent quality-control processes. Advanced production machinery and research and development innovations were introduced to enhance manufacturing capabilities and efficiently meet the evolving needs of customers.

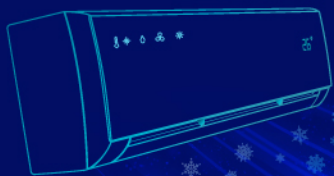

In 2017, Duct Excel Co., Ltd. further expanded its manufacturing capabilities to include Pre-Insulated Duct Panels (PID) made from polyisocyanurate (PIR) for air-conditioning and ventilation systems. Production technology and raw materials were imported from South Korea to ensure that the products meet internationally recognized quality standards.

The Company's products have received certifications in accordance with leading European and United States standards and are designed with environmental responsibility in mind. The Company also manufactures a comprehensive range of duct accessories to ensure that duct systems are assembled in compliance with internationally accepted installation standards.

**BANGKOK HVAC 2026
& BANGKOK E&E 2026**

Duct Excel Co., Ltd. remains firmly committed to placing customers' needs at the heart of its operations. Through high-quality products, prompt delivery, professional consultation, and continuously improved services, the Company strives to achieve the highest level of customer satisfaction and build lasting business relationships.

Brand: ECONOWATT

Company Profile:

OUR HISTORY

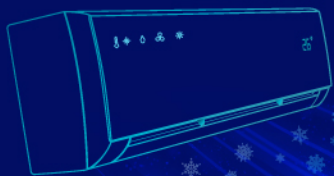

- 1994 Established Thai Energy Conservation Co.,Ltd.
- 1998 The first and only manufacturer of electronic ballasts in Thailand to receive certification under the Quality Management System standards.
- 2004 Commenced ESCO business operations with Energy Performance Contract (EPC) agreements and Measurement and Verification (M&V) in accordance with the International Performance Measurement and Verification Protocol (IPMVP) standards.
- 2005 The first installation of Ozone Water System for Condenser
- 2006 The first and only manufacturer of ozone generators in Thailand to be certified under the ISO 14001 Environmental Management System standards.
- 2014 Expand business into water quality improvement, wastewater treatment, oil-contaminated wastewater, swimming pools, and water recycling systems.
- 2017 Registered in the Thai Innovation List for ozone condenser water treatment system.
- 2018 Registered in the Thai Innovation List for Micro-Bubble Dissolved Air Flotation (MBDAF) system.
- 2021 The first installation Electro Harness Removal System (EHR)
- 2024 Installed in over 500 site references.
